

Abdulrahman Sadek Kamel - AI | ML Developer

Location: Cairo, Egypt

Mobile: (+20) 1026046799 | **Email:** abdulrahmansadek00@gmail.com

LinkedIn: [Abd El Rahman Sadek](#)

Military Status: Completed (2024 - 2025)

Professional Summary

Results-driven Data Analyst and BI Developer with experience delivering data-driven solutions that improve decision-making, reporting efficiency, and product performance for academic, startup, and commercial projects. Proficient in SQL, Python, Power BI, Tableau, and AWS, with a strong background in machine learning and computer vision, including models deployed on real-world datasets. Proven ability to translate complex requirements into actionable insights and analytical products that enhance organizational efficiency and innovation.

Education

Bachelor of Engineering (B.E.) in Computer Engineering

Mansoura University, Egypt | Sep 2019 – Jul 2024

- GPA: 3.4 | Graduation Project: “Actvex” (Management system for fitness coaches) — Specialization in AI/Computer Vision

Technical Skills

Machine Learning & AI: Python (scikit-learn), AI Model Development & Training, Computer Vision.

Cloud & Infrastructure: AWS Academy Cloud Foundations, AWS Cloud Services & Deployment.

Programming & Scripting: Python (NumPy, pandas, Matplotlib).

Data Analysis & Visualization: Data Interpretation, Data Cleaning, Power BI, Tableau, Excel (Advanced).

Databases: SQL Server, Relational Database Design.

Tools & Technologies: Git, Microsoft Office Suite, Jupyter Notebook.

Soft Skills: Communication, Team Collaboration, Problem Solving, Time Management.

Experience

AWS Machine Learning Engineer Trainee — Digital Egypt Pioneers Initiative (DEPI) — Hybrid (Jun 2024 – Dec 2024)

- Delivered 5+ machine learning models on AWS SageMaker for real-world datasets, improving predictive accuracy and automation for internal training projects.
- Built end-to-end ML pipelines (preprocessing, training, hyperparameter tuning, deployment) that reduced manual experimentation time by approximately 30% and standardized model delivery workflows.

AI Software Engineer — [Actvex](#) — *Part-time (6th of October, Giza, Egypt), (Oct 2023 - May 2024)*

- Directed AI and computer vision components for an intelligent exercise-classification system used by 100+ fitness coaches, improving workout tracking reliability for their clients.
- Engineered pose-based form detection and injury-prevention mechanisms that reduced incorrectly performed repetitions by an estimated 25% in pilot tests.

Digital Marketing Intern — **Markeza Group** — *Hybrid (Cairo, Egypt), (Apr 2021 – Feb 2022)*

- Oversaw multi-channel digital campaigns that generated 50,000+ impressions across social platforms, contributing to higher brand visibility during key launches.
 - Formulated data-informed marketing strategies and monitored campaign KPIs, improving click-through and engagement rates by an estimated 10–15% across priority campaigns.
-

Projects

Smart Fitness & Management Solutions (*Graduation Project*)

Mansoura University

- Guided AI/computer vision development for an exercise-classification and form-detection system supporting 10+ exercise types.
- Built a computer vision model that classified exercises and counted repetitions with 95%+ accuracy, enabling reliable automated performance tracking.
- Applied movement-analysis logic to power AI-driven injury-prevention alerts, targeting high-risk posture deviations.
- Earned 3rd place in the Egypt IoT AI Challenge 2024 – Graduation Projects Track, competing against nationwide teams.
- Demonstrated proficiency in end-to-end ML model development from data collection to deployment
- **Technologies:** Python, Machine Learning, Computer Vision, Image Classification, AI Model Training
- **Model Demo:** [Video Link](#)

Build a Machine Learning Image Classifier with Python (*Coursera Project*)

- Created an image classification model trained on 60,000+ MNIST images and evaluated on 10,000+ test samples.
- Ran a 20-epoch training process with dropout regularization (0.2), achieving strong test accuracy while limiting overfitting.
- Processed and normalized 28×28 grayscale images using TensorFlow/Keras pipelines for consistent model input quality.
- **Technologies:** Python, TensorFlow, Keras, Deep Learning, Image Classification

Employee Registration System

Information Technology Institute (ITI)

- Planned and built a database-driven employee management system supporting end-to-end registration and record updates.
- Applied SQL Server to store, query, and manage employee records with structured access to core HR data.
- Structured data models and queries that accelerated employee lookup and registration tasks compared with manual spreadsheets.

Restaurant Management System

Information Technology Institute (ITI)

- Constructed a data management solution to handle restaurant inventory, orders, and customer records in a unified database.
- Authored SQL queries for monitoring inventory, tracking orders, and analyzing customer activity for decision support.
- Organized a relational schema that enabled multi-functional operations such as reporting, stock checks, and order history tracking.

Line Follower Robot (Competition Project)

Mansoura University — IEEE URSI National Radio Science Conference 2021

- Coordinated a team project to build an autonomous line-following robot with sensor-based navigation and control.
- Secured **1st place** at the National Line Follower Competition during the 38th National Radio Science Conference (July 2021).
- Integrated sensors and tuned navigation algorithms to improve tracking stability and responsiveness on competitive tracks.

Certifications

Advanced & Specialized Certifications

- **AWS Machine Learning Engineer** — Digital Egypt Pioneers Initiative — Apr to Oct 2024
- **AWS Academy Graduate: Cloud Foundations** — AWS Academy — August 2024

Core Data & Analytics Certifications:

- **Business Intelligence Development** — Information Technology Institute (ITI)
- **Data Analysis Challenger Track** — Udacity
- **Build a Machine Learning Image Classifier with Python** — Coursera
- **Python Data Science Toolbox — Part 2** — DataCamp
- **Python Data Science Toolbox — Part 1** — DataCamp
- **Introduction to Python** — DataCamp
- **Intermediate Python** — DataCamp
- **Introduction to SQL** — DataCamp

Foundational Training:

- **Artificial Intelligence and Data Science Summer Training Camp** — Science Land
 - **Web Application Development Using ASP.NET MVC** — Information Technology Institute (ITI)
 - **Microsoft Certified: Stress Management** — Microsoft Skills
-

Awards & Recognitions

- **3rd Place — Egypt IoT AI Challenge 2024** — Graduation Projects Track (Smart Fitness & Management Solutions)
 - **1st Place — National Line Follower Competition** — 38th National Radio Science Conference, IEEE URSI (July 2021)
-
